How to use factorization in a sentence WordHippo

To exploit this, a common approach is to factorize the operator once and apply the factorization to the following steps. But since our current GPU does not support double precision, we use the CPU for matrix assembly and factorization in later iterations in order to get accurate results.

What is the difference between non negative matrix

What is the difference between non-negative matrix factorization and singular value decomposition? SVD factors can be related to Eigen-functions of a system when original matrix represented a system about which one is interested in terms of signal processing perspective. They are used in sub-space decomposition, characteristic matrices (useful in speech and image processing - face

The deep structure revealed by the Jones factorization theorem that every Ap weight can be factored as the product of two A1 weights was conjectured by Muck-enhoupt [74] at the Williamstown conference in 1979, and Jones [60] proved it at the same conference. His proof was highly technical and

Factorization Wikipedia

In mathematics, factorization (or factorisation, see English spelling differences) or factoring consists of writing a number or another mathematical object as a product of several factors, usually smaller or simpler objects of the same kind. For example, 3 5 is a factorization of the integer 15, and (x 2)(x + 2) is a factorization of the polynomial x 2 4. Factorization is not
